Quantitative Techniques and Data Interpretation

Instructions

For the following questions answer them individually

Question 1

Two pipes A andBcan fill a tank in 5 hours and 20 hours respectively. Both pipes together can fill the same tank in:

- A 4 hours
- B 6 hours
- C 10 hours
- **D** 2 hours

Answer: A

Question 2

In June-2020, the ratio of boys to girls in a college was 3:2. In September-2020, there were 80 fewer boys and 20 fewer girls in the college and the ratio of boys to girls was 7:5. What was the total number of students in the college in June-2020?

- **A** 1000
- **B** 1100
- C 1200
- **D** 1300

Answer: D

Question 3

M is a 4-digit number. If the left most digit is removed, then the resulting three digit number is $\frac{1}{9}$ of M. How many such M's are possible?

- **A** 10
- **B** 9
- **C** 8
- **D** 7

Answer: D

Question 4

L and M together can complete a piece of work in 72 days, M and N together can complete it in 120 days, and L and N together in 90 days. In what time can L alone complete the work?

- A 150 days
- B 80 days
- C 100 days
- **D** 120 days

Answer: D

Given below are two statements

Statement I : The set of numbers (5,6, 7, p, 6, 7, 8, g) has an arithmetic mean of 6 and mode (most frequently occurring number) of 7. Then $p \times q = 16$.

Statement II: Let p and q be two positive integers such that $p+q+p \times q=94$. Then p+q=20.

In light of the above statements, choose the correct answer from the options given below

- A Both Statement I and Statement II are true
- B Both Statement I and Statement II are false
- C Statement I is true but Statement II is false
- D Statement I is false but Statement II is true

Answer: B

Question 6

A milkman adds 10 litres of water to 90 litres of milk. After selling $\frac{1}{5}th$ of the total quantity, he adds water equal to the quantity he sold. The proportion of water to milk he sells now would be:

- **A** 72:28
- **B** 28:72
- C 20:80
- **D** 30:70

Answer: B

Question 7

In a $\triangle ABC, D, E$ and F are the mid-points of the sides AB, BC and CA respectively. Then the ratio of the area of a $\triangle DEF$ and the area of a $\triangle ABC$ is:

- **A** 1:4
- **B** 1:2
- C 2:3
- **D** 4:5

Answer: A

Question 8

A 100-meter long train crosses a 200-meter long and 20-meter wide bridge in 20 seconds. What is the speed of the train in Km/hour?

- **A** 45
- **B** 36
- c ₅₄

Given below are two statements:

Statement I:
$$\sqrt{7}+\sqrt{5}$$
 $\sqrt{7}-\sqrt{5}$ $\sqrt{7}+\sqrt{5}=2$

Statement II: If
$$a+b+c=0$$
, then $(a^3+b^3+c^3)\div abc=3$

In light of the above statements, choose the correct answer from the options given below

- B Both Statement I and Statement II are false
- C Statement I is true but Statement II is false
- D Statement I is false but Statement II is true

Answer: A

Question 10

Given below are two statements:

Statement I: Acoin is tossed three times. The probability of getting exactly two headsis = d StatementII: In tossing of 10 coins, the probability of getting exactly 5 heads is §3 256° In thelight of the above statements, choose the correct answer from the options given below.

- B Both Statement I and Statement II are false
- C Statement is true but Statement II is false
- D Statement I is false but Statement II is true

Answer: A

Question 11

If
$$x^2-3x+2$$
 is a factor of x^4-px^2+q , then (p,q) =

- **A** (5,2)
- **B** (5,4)
- **C** (-5,-4)
- **D** (-5,4)

Answer: B

Question 12

In a 100 meter race, A beats B by 10 meters and B beats C by 5 meters. By how many meters does A beat C?

A 15.0 meters

B 15.5 meters

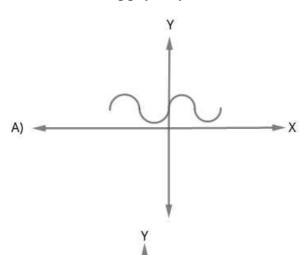

Mohan bought a trouser at 10% discount and sold it to Sohan at a loss of 10%. If Sohan paid Rs. 729 for the trouser to Mohan, then what was the undiscounted price of the trouser?

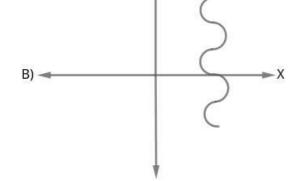

- **A** Rs. 900/-
- **B** Rs. 800/-
- **C** Rs. 1000/-
- **D** Rs. 911.25/-

Answer: A

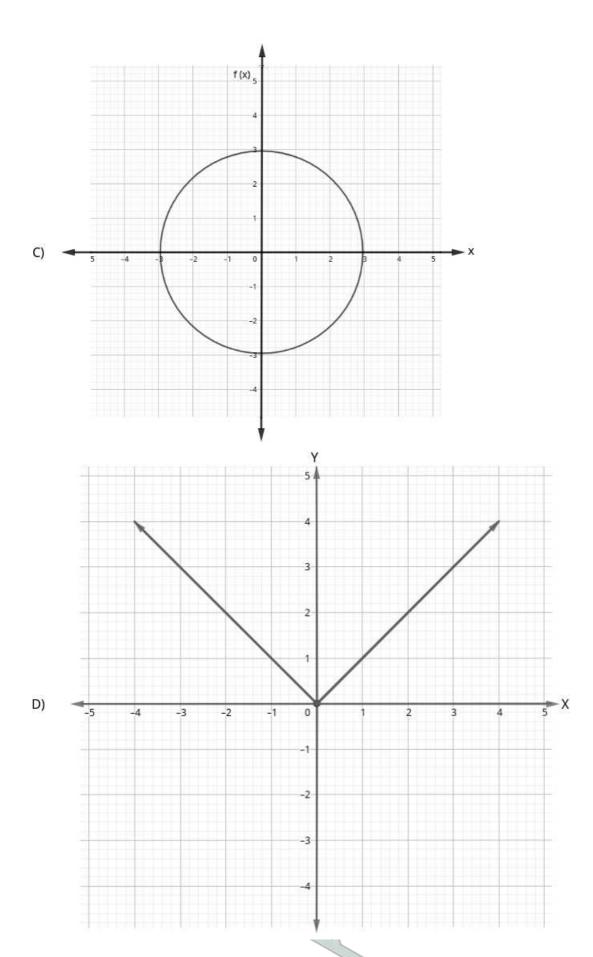

Which of the following graphs represent the function of x?

Choose the correct answer from the options given below:

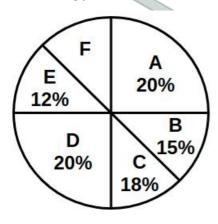

- ${\bf A}$ (A), (B) and (C) only
- **B** (A), (B) and (D) only

- c (A) and (D) only
- D (A) and (C) only

Answer: C

Question 15

The following pie-chart indicates the monthly domestic budget of a family:

where A = Food: B = Conveyance; C = Clothing: D = House Rent: E = Miscellaneous Expenses: F = Saving.

If the monthly saving of the family is Rs. 4500, then the monthly income of the family is:

- A Rs. 45000
- **B** Rs. 30000
- **C** Rs. 25000
- **D** Rs. 20000

Answer: B

Question 16

Two sisters Neha and Monica walk to school from the house. Neha takes 40 minutes while Monica takes 30 minutes. One day Neha started 5 minutes earlier than Monica. In how many minutes would Monica overtake Neha?

- **A** 5
- **B** 15
- **C** 20
- **D** 25

Answer: B

Given below are two statements

Statement I: A committee of 4 can be made out of 5 men and 3 women containing at least one woman in 65 ways.

Statement II: The number of words which can be formed using letters of the word ARRANGE' so that vowels always occupy even place is 36.

In light of the above statements, choose the correct answer from the options given below

- Both Statement I and Statement II are true
- Both Statement I and Statement II are false
- Statement I is true but Statement II is false
- Statement I is false but Statement II is true

Answer: A

Question 18

If A:B=C:D , then the value of ${A^2+B^2 \over C^2+D^2}$ is

Answer: D

Question 19

The dimensions of a floor are 18×24 . What is the smallest number of identical square tiles that pave the entire floor without the need to break any tile?

- 24
- C 8
- 12

Answer: D

Question 20

Which of the following statements regarding quadratic equations are true?

- (A) Solution set for the equation $6x^2-5x=4$ is $\left\{-\frac{1}{2},\frac{4}{3}\right\}$ (B) The nature of the roots of the equation $9x^2+6x+1=0$ is equal, real and rational.
- (C) If one root of $4x^2-3x+K=0$ is 3 times the other, then $K=rac{2}{256}$
- (A),(B) and (C)

- R (A) and (B) only
- C (B) and (C) only
- D (C) and (A) only

Answer: B

Question 21

Arrange the following rational numbers in ascendingorder:

- (A) 5
- (B) 12^{-5}
- (C) $\frac{-7}{18}$
- (D) $\frac{-2}{3}$
- **A** (A), (B), (D), (C)
- **B** (C), (D), (B), (A)
- C (A), (D), (B), (C)
- **D** (D), (C), (B), (A)

Answer: C

Question 22

Match List I with List II.

Let A and B be events with $P(A)=\frac{2}{3}, P(B)=\frac{1}{2}$ and $P(A\cap B)=\frac{1}{3}$

$\begin{array}{ccc} \text{List} & \text{List-II} \\ \text{Probability of an event} & \text{Value} \\ \text{(A) } P(A \cap B^c) & \text{(I) } \frac{2}{3} \\ \text{(B) } P(A \cup B^c) & \text{(II) } \frac{1}{3} \\ \text{(C) } P(A^c \cap B^c) & \text{(III) } \frac{5}{6} \\ \text{(D) } P(A^c \cup B^c) & \text{(IV) } \frac{1}{6} \end{array}$

(Here c stands for complement)

Choose the correct answer from the options given below:

- **A** (A)-(II), (B)-(III), (C)-(IV), (D)-(I)
- **B** (A)-(IV), (B)-(III), (C)-(II), (D)-(I)
- C (A)-(I), (B)-(III), (C)-(IV), (D)-(II)
- **D** (A)-(II), (B)-(IV), (C)-(III), (D)-(I)

Answer: A

In the year 2020, Production of Sugar (in Million Tonnes) by six major production units A-F of India are shown in the table given below:

Month	Α	В	С	D	E	F
April	310	180	169	137	140	120
May	318	179	177	162	140	122
June	320	160	188	173	135	130
July	326	167	187	180	146	130
August	327	150	185	178	145	128

What was approximate percentage decrease in sugar production of unit B in June as compared to April?

- A 8%
- **B** 11%
- C 15%
- **D** 18%

Answer: B

Question 24

The difference between the compound interest and simple interest for the amount Rs 5000/- in 2 years is Rs. 32. Then the rate of interest per annum is:

- A 5%
- **B** 8%
- C 10%
- **D** 12%

Answer: B

Question 25

Given below are two statements

Statement I: In the sequence of numbers 30, 90, 182, 306, 462,P....... the term P is 650.

Statement II : There are 8 digits in 9^8 when it is expressed in decimal form.

In light of the above statements, choose the correct answer from the options given below

- A Both Statement I and Statement II are true
- B Both Statement I and Statement II are false
- C Statement I is true but Statement II is false
- D Statement I is false but Statement II is true

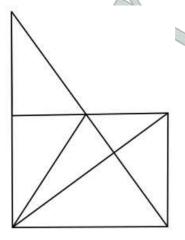

Answer: A

Logical Reasoning

Instructions

For the following questions answer them individually

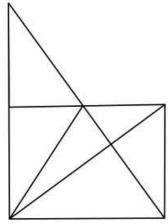

Find the number of triangles in the given figure :

- **A** 11
- **B** 13
- **C** 15
- **D** 17

Answer: B

Explanation:

On counting the total triangles comes out to be 13

Question 27

One statement and two conclusions for the statement are given. Read the statement, think logically about the conclusions and mark the correct option which follows the statement.

Statement: Socialization has an outcome.

Conclusion:

- A. The persons being socialized acquire new skills.
- B. Socialization does not lead to change in behaviour.
- A Only conclusion A follows
- B Only conclusion B follows

C Either A or B follows

D Neither A nor B follows

Answer: A

Explanation:

Has an outcome can be related to skills acquired if person is socialized so I follows and Has an outcome does not mean change in behaviour so II do not follow

Question 28

Find the missing number in the given series:

8, 13, 10, 15, 12, ____

- **A** 14
- **B** 17
- **C** 18
- **D** 20

Answer: B

Explanation:

we have 8, 13, 10, 15, 12

Here the pattern is 8+5=13, 13-3=10, 10+5=15; 15-3=12 so next term will be 12+5=17

Question 29

Complete the sequence:

30, 56, 90, _____, 182, 240.

- **A** 145
- **B** 132
- **C** 110
- **D** 160

Answer: B

Explanation:

30, 56, 90, _____, 182, 240.

Here the first differences forms an A.P with a common difference of 8 so we get next term as 90+42 = 132.

Question 30

Find out which of the given statement(s) is/are sufficient to answer the following question Who scored the highest marks in the class?

Statements:

- (A) Pawan scored 98% marks in the class.
- (B) Swati scored more than 98% marks in the class.
- (C) The marks of all the students were less than that of Swati's marks.

Choose the correct answer from the options given below:

A (A) only

- **B** (B) and (C)
- **C** (A), (B) and (C)
- D (C) only

Answer: D

Explanation:

As per C Swati will be the highest scorer

Question 31

The given statement is followed by two arguments-I and II. Decide which argument(s) is/are correct for the statement. Statement: We should plant more trees.

Argument I. Trees help in reducing pollution.

II. Trees occupy too much of the earth's space.

- A lis true
- B II is true
- C Either I or II
- D Neither I nor II

Answer: A

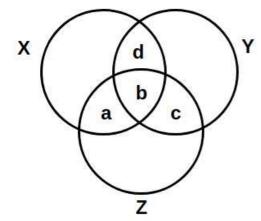

Explanation:

Statement We should plant more trees.

Argument should be supportive and as 1st statement says it helps in reducing pollution which is goof 1 is correct 2 highlights a negative and will not be a reason to plant more trees so II is false.

Question 32

Given below is a diagram of three circles X. Y and Z which represent musicians, singers and dancers, respectively. The circles intersect with each other and form regions- a, b, c and d. Select the region that represents musicians who are singers but not dancers.

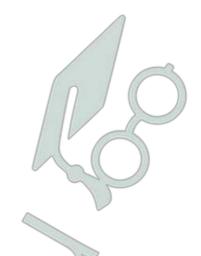

B Only d

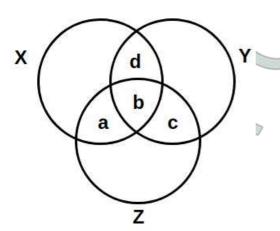

C a and d

D b and d

Answer: B

Explanation:

- X Musicians
- Y singers
- Z Dancers

so we can say b represents all three and d will represent region pf Musicians and Singers but not Dancers

Question 33

Find the odd one out:

- A KMOQ
- **B** SUWX
- C ACEG
- **D** IKMO

Answer: B

Explanation:

Except SUWX all have a uniform change from one alphabet to other.

Question 34

If CLAUSE is coded as ECSLUA. then the code of UMPIRE will be

- **A** MRPIUE
- **B** UEMRIP
- **C** ERUMIP
- **D** EURMIP

Answer: D

Explanation:

CLAUSE is written as ECSLUA

Noe let C be 1 L be 2 A be 3 U be 4 S be 5 and E be 6
we get code as 615243
similarly taking UMPIRE as 1,2,3,4,5,6
we will get code as 615243
which will correspond to EURMIP

Question 35

Find the wrong number in this sequence:

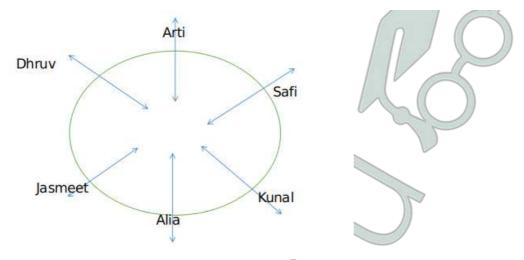

72, 70, 67, 65, 58, 52, 45

A 58
B 65
c 52
D 70
Answer: B
Explanation: The series should be 72-2 =70; 70-3 =67;67-4=63;63-5 =58;58-6 =52; 52-7=45 so 65 is the wrong term Question 36
In a certain language 'Roses are red' is coded as 'ko ti na'. "Roses are beautiful' is coded as 'ho ti na'. Whatis the codefor red' in that language?
A ti
B na
C ho
D ko
Answer: D
Explanation: Comparing two statements we have Roses are as common so we can say ti na will correspond to Roses are in any order Therefore red will be ko
Question 37
Six friends are sitting around a circular table in such a way that they are equidistant from each other. Kunal is sitting to the right of Alia and Dhruv is sitting between Arti and Jasmeet. Safi is sitting opposite to Jasmeet and to the right of Kunal. Who is sitting between Arti and Kunal?
A Alia
B Jasmeet
C Safi

D Dhruv

Answer: C

Explanation:The arrangement will be:

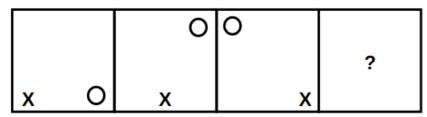

Safi is sitting between Arti and Kunal

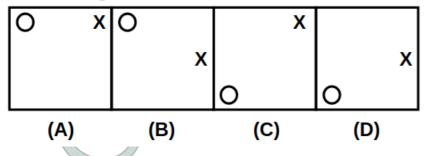

Question 38

Select the suitable figure from the answer figure that would replace the question mark (?)

Problem Figure:

Answer Figure:

- **A** A
- **B** B
- **C** C
- **D** D

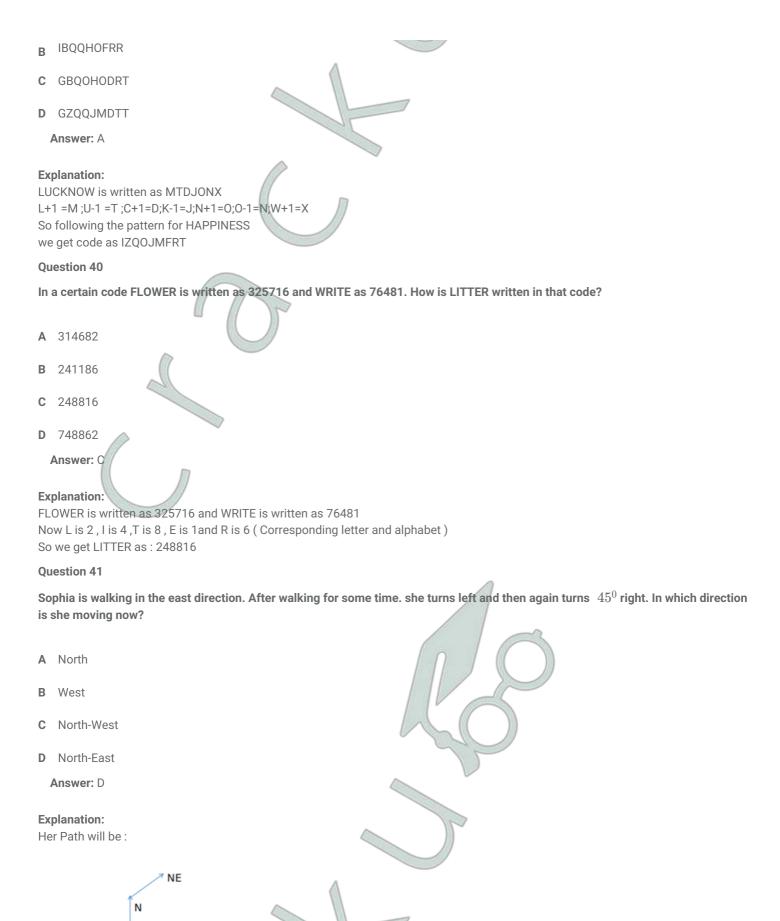

Answer: D

Explanation:

Following the pattern for both cross and circle we get D as the answer

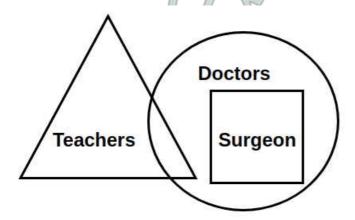

Question 39

In a certain code, LUCKNOW is written as MTDJONX and SURFACE as TTSEBBF. How is HAPPINESS written in that code?

We can say she is moving in North East direction

Observe the given figure and read the statements (I), (II) and (III).

Statements:

- (I) All teachers are doctors
- (II) Some doctors are teachers
- (III) All surgeons are doctors

Which of the following statement(s) is/are correct:

- A (I), (II) and (III)
- B (I) and (III)
- C (I) and (II)
- D (II) and (III)

Answer: D

Explanation:

The only conclusions that follows from the given venn are :Some doctors are teachers and All surgeons are doctors Hence II and III is the answer.

Question 43

Given below are two statements, one is labelled as Assertion A and the other is labelled as Reason R.

Assertion A: Solar energy is in abundance on the planet earth.

Reason R: Solar energy is available only in summer season.

In light of the above statements, choose the correct answer from the options given below.

- A Both A and R are true and R is the correct explanation of A
- B Both A and R are true but R is not the correct explanation of A
- C A is true but R is false
- **D** A is false but R is true

Answer: C

Explanation:

Assertion is correct

Reason is wrong as solar energy is available throughout the year

Question 44

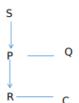

P is the father of R, Q is the sister of P, R is the brother of C and S is the mother of P. How is R related to S?

- A Grandson
- **B** Granddaughter
- C Mother
- **D** Father

Answer: A

Explanation:

We get the tree as:

So R is grandson of S.

Question 45

Ansh is taller than Akshita but shorter than Sharad. Akshita is shorter than Sharad but taller than Sneha. Who is the tallest one?

- A Sharad
- **B** Akshita
- C Sneha
- **D** Ansh

Answer: A

Explanation:

From 1st line we get:
Sharad > Ansh > Akshita
From 2nd we get
Akshita > Sneha
so we get
Sharad > Ansh > Akshita > Sneha
Hence Sharad is the tallest

Question 46

 $\label{lem:choose the missing item in the series:} \\$

CDFG, IJLM, OPRS,____, ABDE

- A UWYZ
- **B** TUVW
- C UVXY
- **D** STUV

Answer: C

Explanation:

Considering the first letter of given terms

it forms pattern

C, I, O, _, A

I and C have 5 alphabets between them , I and O also have 5 alphabets between them so we get first term as U .

Now considering 2nd letter of given terms:

D,J,P _,B

Here again D and J have 5 alphabets between them

J and P have 5 alphabets between them

So next letter will be V

so we get UV

We can conclude the answer will be UVXY

Question 47

In analogy, you are required to guess the relation between the two given words and fill in the blanks after finding the similar relationship by choosing any word from the options given below:

BEES: SWARM:: LIONS:____

- A SCHOOL
- **B** PACK
- C PRIDE
- **D** BAND

Answer: C

Explanation:

This is a collective noun question so we get PRIDE.

Question 48

A says to B, 'I am the mother of your grandfather's son.' How is A related to B?

- **A** Grandmother
- **B** Sister
- C Daughter
- **D** Grandson

Answer: A

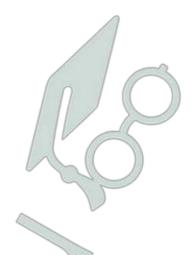

Explanation:

Grandfather's son will be B 's father And A will be the grandmother of B .

Question 49

Aman is five ranks ahead of Ishain class of 30 students. If Isha's rank is 14^{th} from the last, then what is Aman's rank starting from Chetan at the 1^{st} position?

A 13^{th}

- \mathbf{B} 12^{th}
- C 16th
- **D** 19^{th}

Answer: B

Explanation:

Ishan is 14th from last so Ishan is 30-14+1 = 17th from start

Aman is five ahead of Ishan so we get Aman's rank as 17-5 = 12th from start

Question 50

A, B, C and D play tennis. B and C play football also. D does not play chess but plays badminton. Who plays only tennis?

- A D
- **B** B
- C A
- **D** C

Answer: 0

Explanation:

B and C plays football and Tennis D plays badminton and Tennis so A plays only Tennis

Language Comprehension

Instructions

Read the given passage and answer the questions that follow.

Few doctor have any time for the study of philosophy, for their profession is an exacting one, and it is all they can do to keep abreast of its advances. What is true of Medical Science is also true of the whole civilized world. Men at present are so engrossed in their various occupations, in manufacturing goods, in buying and selling, in accumulating wealth or in struggling merely to maintain themselves that they have no time left to wonder what living is all about.

Question 51

The expression "it is all they can do" in the first sentence conveystheidea of all that

- A doctor can manage to do
- **B** philosopherssay is good for man
- C doctors are expected to do
- D people todayare willing to do

Answer: A

Question 52

The expression that "their profession is an exacting one" is the best described by which one of the following statements?

- A Doctors have to be very precise in their work
- B Medical Science is a well-defined subject
- C Doctors have a challenging job with hardly any spare time
- D Medical Science is a more exact subject than philosophy

Answer: 0

Question 53

The author compares medical profession with various other occupation in order to show that

- A Doctors are much more busy than peoplein other occupations
- B Doctor had to read a great deal online people in other occupations
- C Thestudyofphilosophyis particularly important to doctors
- D People in their occupations have no more time to study philosophy than doctors have

Answer: D

Instructions

Read the given passage and answer the questions that follow.

Our government has taken/ propose a number of major initiatives during the eleventh Five Year Plan. Some of the new initiative in the school and literacy sector and higher and technical education sector include: right of children to free and compulsory education, launching a Saakshar Bharat, ICT in secondary school and in open and distance learning. evolving a national curriculum framework for teacher education, examination reform in accordance with NCF- 2005, introducing a system of replacement of marks by grades at the secondary stage in school affiliated to CBSE. recommendation of Yash Pal Committee and National Knowledge Commission, establishment of 14 innovation Universities aiming at world class standards, setting up 10 new national institutes of technology. launching of new scheme of interest. subsidy on educational loan taken for professional courses by the economically weaker students, scheme for setting up of 374 model degree colleges in districts, 150 women's hostels for women of weaker sections and minorities, academic reforms like semester system, choice based credit system, regular revision of syllabi, impetus to research etc.

Question 54

The free and compulsory education bill of the eleventh Five Year Plan is a major initiative towards

- A Technical Education
- **B** Mass education
- C Replacing Grade to marks
- D Sarva Shiksha Abhiyan

Answer: C

Question 55

Technical education is encouraged by our governmentbythe introduction of

- A ICT in open and distance learning
- B Ten new National Institutes of Technology

- c Innovation Universities
- D The National Knowledge Commission

Answer: B

Question 56

In order to ensure all round development in the field of education our government should take steps towards

- A Educating all women andpeople below poverty line
- B The enhancement of the learning achievements
- C The implementation of the eleventh Five Year Plan and the eradication of caste, creed and gender bias
- D all of the above

Answer: D

Ouestion 57

The overall Idea behind the passage is

- A Importance to higher education
- B Importance to people below poverty line
- C Women's education
- **D** None of these

Answer: A

Instructions

Read the given passage and answerthe questionsthat follow.

Education is not only an instrument for enhancing efficiency but also an effective tool of augmenting and widening democratic participation and upgrading the overall quality of individual and society. India has a vast population and to capture the potential demographic dividend to remove the acute regional, social and gender imbalances, the government is committed to make concerted efforts for improving the quality of education as mere quantitative expansion will not deliver the desired results in view of the fast changing domestic and global scenario.

Question 58

High quality education can help the individual to balance between

- A the mark system and the grading system
- B regional, social and gender differences
- C the inequalities between the rich and the poor
- D the past, present and the future

Answer: B

Question 59

According to the author, education not only enhancestheefficiency of the learner, it also

- A widens his / her democratic participation
- B upgrading overall quality of individual
- **C** improving society
- D all of the above

Answer: D

Question 60

Mere quantitative expression of education doesn't deliver the desired results, because

- A education is the overall growth of a person
- B the fast-changing global scenario is challenging
- **C** it is the duty of the government to improve the quality of education
- **D** people are willing to invest more on education

Answer: B

Instructions

Read the given passage and answer the questions that follow.

Philosophy of Education is a label applied to the study of the purpose, process, nature and ideals of education. It can be considered a branch of both philosophy and education. Education can be defined as the teaching and learning of specific skills and imparting of knowledge, judgment and wisdom, is something broader than the societal institution of education we often speak of.

Many educationalists consider it a weak and woolly field, too far removed from the practical applications of the real world to be useful. But philosophers dating back to Plato and the Ancient Greeks have given the area much thought and emphasis, and there is little doubt that their work has helped shape the practice of education over the millennia.

Plato is the earliest important educational thinker, and education is an essential element in "The Republic" (his most important work on philosophy and political theory, written around 360 B.C.). In it, he advocates some rather extreme methods: removing children from their mothers' care and raising them as wards of the state, and differentiating children suitable to the various castes, the highest receiving the most education, so that they could act as guardians of the city and care for the less able. He believed that education should be holistic, including facts, skills, physical discipline, music and art. Plato believed that talent and intelligence is not distributed genetically and thus is be found in children born to all classes, although his proposed system of selective public education for an educated minority of the population does not really follow a democratic model.

Aristotle considered human nature, habit and reason to be equally important forces to be cultivated in education, the ultimate aim of which should be to produce good and virtuous citizens. He proposed that teachers lead their students systematically, and that repetition be used as a key tool to develop good habits, unlike Socrates' emphasis on questioning his listeners to bring out their own ideas. He emphasized the balancing of the theoretical and practical aspects of subjects taught, among which he explicitly mentions reading, writing, mathematics, music, physical education, literature, history, and a wide range of sciences, as well as play, which he also considered important.

During the Medieval period, the idea of Perennialism was first formulated by St. Thomas Aquinas in his work "De Magistro".

Perennialism holds that one should teach those things deemed to be of everlasting importance to all people everywhere, namely principles and reasoning, not just facts (which are apt to change over time), and that one should teach first about people, not machines or techniques. It was originally religious in nature, and it was only much later that a theory of secular perennialism developed.

Question 61

Whatis the difference between the approaches of Socrates and Aristotle?

Aristotle felt the need for repetition to develop good habits in students: Socrates felt that students need to be constantly questioned

Aristotle felt the need for rote-learning: Socrates emphasized on dialogic learning There was no difference Aristotle emphasized on the importance of paying attention to human nature; Socrates emphasized upon science **Question 62** Whydo educationists consider philosophy a 'weak and woolly' field? It is not practically applicable Its theoretical concepts are easily understood It is irrelevant for education Noneofthe above Answer: A **Question 63** Were Plato's beliefs about education democratic? He believed that only the rich have the right to acquire education Yes В He believed that only a select few are meant to attend schools Hebelieved that all pupils are not talented Answer: B **Question 64** Whydid Aquinas propose a modelof education which did not lay much emphasis on facts? Facts are not important Facts do not lead to holistic education Facts change with the changing times

Instructions

Answer: C

For the following questions answer them individually

Question 106

Who has launched the UPI-based payments app in the country by the name of 'Tez'?

- **A** IBM
- **B** Google
- C Microsoft
- D TCS

Answer: B

Instructions

After reading the passage given below, choose the best answer to each question that follows.

What advice would I give to new entrepreneurs who need funding? Forget about your business plan and buy a lottery ticket — your chances are better. My point is that when you need venture funding no one will give any money until you already have a marketable product. In other words, funding comes just when you do not need it. A myth is that the way to start a venture is to create a great business plan, perfect your pitch, and then present this to investors, starting with venture capitalists. If that does not work, you knock on the door of angel investors. But ask any entrepreneur who has called on venture capitalists and they will probably tell you that it is almost impossible to even get calls returned. If venture capitalists do respond and you are invited to present your idea, the process will drag on for many months while you borrow more and survive on hope. If you do hit the jackpot, you are required to let the investors make many of the business decisions in exchange for an investment. To be fair, most business plans do not deserve funding. Venture capitalists receive hundreds of plans every week, and few are worth the paper they are printed on. Everyone jumps on the same new trend, or the ideas are so far out that they have no chance of success. And great ideas are not enough: it takes experienced

management, excellent execution, and a receptive market. It is hard for even the best venture capitals to identify the potential successes. So what should an entrepreneur do? What all new entrepreneurs should understand is that, even if you have a realistic business plan for a great idea that can change the world, you need to develop it yourself until you can prove it. Focus on validating your idea and building it up. Raise money to get started by begging and borrowing from family and friends. And be prepared to dip into your savings and credit cards, obtain second mortgages, and perhaps look for consulting work or customer advances. There is no single recipe for developing your business idea yourself, but there are some essential ingredients. Here are some pointers: Consult widely. Share your ideas with those who have done it before. You can learn a lot from the experience of seasoned entrepreneurs, and they are much more approachable than you think. If you cannot find anyone who is excited about your idea, the chances are it is not worth being excited about. This may be time to reflect deeply and come up with another. Identify markets. Speak to anyone who can help you understand your target customers. If you can sell your concept, some customers may help you find it or agree to be a test site or a valuable reference. Customers do not usually know what they want, but they always know what they do not need. Make sure that there is a real need for your product. Start small. Your idea may be grand and have the potential to change the world, but you are only going to do this one step at a time. Look for simple solutions, test them and learn from the feedback. If you are starting a restaurant, work for some one else first. If you are creating a software product, learn by doing some consulting assignments or create some utilities. You do not have to start with the ultimate product. Watch every penny. Focus on revenue and profitability from the start. Find creative ways to earn cash by selling tactical products, prepaid licenses or royalties. Pay employees partially in stock. Look for access to free hardware or premises. And sweep the floors yourself. In short, use any methods to avoid costs. Prepare for the worst. It is going to take longer than you think. There will likely be product problems, unhappy customers, employee turnover, and lots of financial challenges. You may even fail a number of times before you achieve your goals. By learning from each success and failure alike, you increase the odds that you eventually make it. Keep your integrity. Never forget the importance of business ethics and your own values. Ethics need to be carefully sewn into the fabric of any start-up. And the only way to reach long-term success is by achieving outstanding customer satisfaction. With a lot of luck and hard work you may build a successful company that markets products customers really want. It is very likely that by this stage, you receive the phone calls from venture capitalists. This is the time to think of exit strategies and decide if you want to own a small piece of a big pie or a large piece of a small pie. (The passage taken from Book/News/Open source)

Question 107

"a marketable product" as mentioned in the passage signifies:
